How to use the Flooding API?
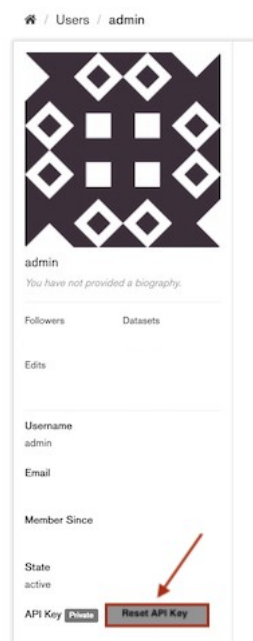

1. Requests access to the Flooding datasets following the instructions in this document.

2. Once you have a SmartDublin user you need a SmartDublin API Key.

> 1. Login into SmartDublin (Login button in the header menu)

> 2. Go to your user page clicking in your name in the header menu

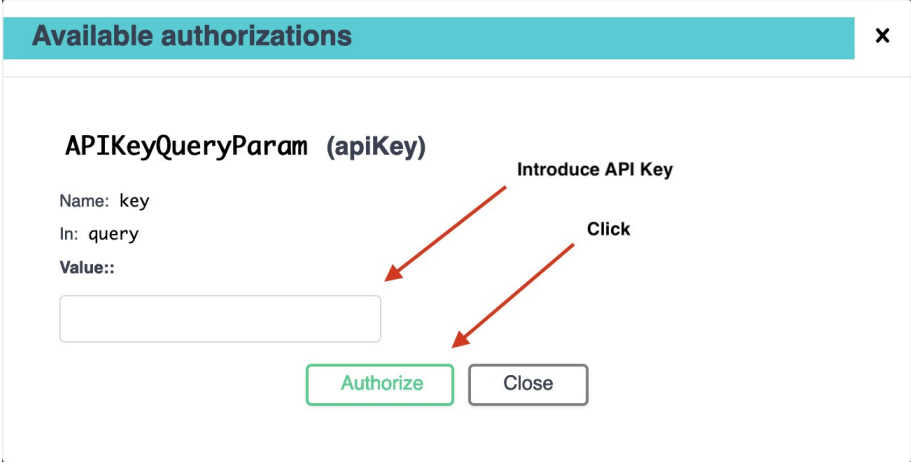

> 3. Reset your API Key

4. The new API Key will be shown only once, store it in a secure place

3. Use your API Key in the Flooding API

     1. Click in the Authorize button in the flooding-api page

     2. Introduce the API Key in the popup window

     3. Click Authorize

     4. You are set up to use the Flooding API

Flooding API Response codes

200. Success status response code indicates that the request has succeeded.
